Textile and Sublimation Printing

The ultimate green printing process!

All your images will include an antiglare finish to absorb light, thereby eliminating reflection, and maintaining the brilliance of your colours.

This technique enables precision, high-quality printing with unlimited colour.

Digital engraving and cutting

Engraving technology allows for cutting or engraving of graphic, photographic, and textual elements while maintaining a commitment to quality and precision using the latest technology.

Digitally controlled cutting cuts an outline using a very fine, sharp edge.

This truly modern technology offers unequalled speed, production capacity, and degree of precision.

Product Types
